Many studies have provided insight into the link between 5G and neurological issues, cardiac issues, and cancer, to name a few examples.

For the Jurors of our Grand Jury of August 26, 2024 Ballot for Cause 08262024-GJBallot 8-5G, mRNA

Evidential Explanation

The majority of the Oregon public has taken at least one COVID shot, the components of which vary greatly by batch. We are currently aware of modified mRNA (mmRNA), hydrogel, multiple heavy metals, graphene oxide/hydroxide, and fluorescent microrobots (Q dots) present in varying amounts in most COVID shots.

As a result of shedding and a contaminated food supply (which is primarily the result of strategic aerosol injection), most humans and living organisms are corrupted with the above substances. This has been substantiated by numerous professionals worldwide including OSJA (Oregon Statewide Jural Assembly) studies. These adulterants are directed to self-assemble and create networks to transmit and receive information via 5G and 'the cloud' regarding our physiological workings and thoughts. This has been discussed and published in academic, military, government and 'private' front company white papers for over 20 years.

This 'artificial intelligence' within, parasitizes us for its energy needs.
